What are NFT's?

A non-fungible token (NFT) is a unique and non-interchangeable datum stored on a digital ledger (blockchain).[1] NFTs can be used to represent easily reproducible items such as photos, videos, audio, and other types of digital files as unique items (analogous to a certificate of authenticity), and use blockchain technology to establish a verified and public proof of ownership. Copies of the original file are not restricted to the owner of the NFT, and can be copied and shared like any file. The lack of interchangeability (fungibility) distinguishes NFTs from blockchain cryptocurrencies, such as Bitcoin.

On all giftbag NFT transactions a Percentage to be determined will be used to further increase giftbag token liquidity.
